SPAS.ca

Exceptional Quality at Realistic Prices

All products are certified to CSA standards C22.2, 218.1, 218.2

## Relaxation

Sunray Spas  
has redefined  
“hydrotherapy”.

All of our spas  
are designed  
to fit the  
contours  
of your body,  
and give  
support  
where it is  
needed  
the most.

Hydrotherapy is one of the most popular treatments for arthritis, athletic, joint and muscle pain relief. Restoring and preserving strength, it also protects joints from further strain.

The warm water works to make collagen tissue more stretchable so movement can resume with less pain and help restore your range of motion. The stimulating massage jets increase circulation and speeds up your body's own natural healing process.

## Family Time

With today's hectic schedules, it's necessary to take time out and enjoy it with your family and friends. Put the fast-paced work world aside for a few moments each day and just sit back, relax and enjoy. You won't believe the results.

From get-togethers with friends, to quality time as a family, there is no better place to enjoy someone's company than relaxing at home in your Sunray spa.

## Quality Assurance

One of the major advantages Sunray has over most of its competitors is our “Dual Zone Insulation System” (D.Z.I.S.).

We’ve taken the key features from other manufacturers and developed a spa that is so efficient, thousands of customers worldwide agree it is the most efficient design on the market.

Sunray’s Quality Control Department has established a rigorous point-by-point inspection. Once completed, the spa is evaluated and then certified to CSA standards.

Our newest cabinet was definitely designed with the customer in mind. The 4 access panels will - hands down - be the easiest spa in the industry to service.

Our full pedestal base keeps rodents and insects out and keeps the heat locked in. Your spa will be protected during the harsh winter months even during the course of a power failure.

## Peace of Mind

Sunray has been manufacturing Hot Tubs and Spas for over 12 years. We have expanded once again, adding a second production line, which will enable us to keep up with the high demand of our products world-wide.

Looking for a hot tub shouldn't be an overwhelming experience. At Sunray, we've taken the guess-work out for you and have designed a comfortable, efficient, durable spa that unlike many others, is also affordable.

The founder of Sunray has set up manufacturing facilities world-wide, training people on proper techniques and to exceed the industry standards. Keeping up with new technology while keeping costs down is the main objective.

Sunray Spas guarantees the lowest prices while our warranty proves you are getting one of the best spas money can buy.

**Finally...you can relax.**

When purchasing a spa in today's market, how do you ensure you are getting a comfortable, well engineered design?

One way is by doing a "wet test" before you buy and the other is to make sure you are getting a design that fits your specific needs. The possibilities are endless at Sunray.

## Unique Selection

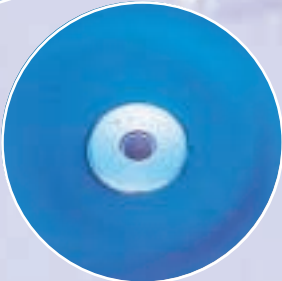

No matter what your needs may be, we will try our best to accommodate you.

Pick your design, pick your options and jetting packages and we'll put a package together that is customized just for you. Why settle for less?

## Pure H<sub>2</sub>O

At Sunray Spas, we know you how busy life gets and your free time should be spent with family and friends enjoying your spa... not maintaining it. Sunray's Corona Discharge Ozone System means crystal clear water with less hassle. It produces the maximum amount of ozone which is an extremely powerful oxidizing agent. It helps eliminate foreign contaminants that build up in the water and thereby reducing the need for excessive chemicals in your spa. To us it means customer satisfaction - to you it means peace of mind.

# Creative Designs

When you buy a Sunray Spa, you can be assured that you are buying a quality product that you and your family will enjoy for many years to come.

The head of our mold department has field-tested

21 different spas over the past 12 years, each time

allowing him to evaluate the comfort and design

and using that information to enhance his

existing creations.

#525 • 87.75" x 87.75" x 38"
